Re: Obsolescence of ZUP 80V and 120V output models

Dear Valued Customer / Partner,

The TDK-Lambda ZUP series of programmable power supplies was launched 19 years ago. With the introduction of the Z+ series six years ago, covering output voltages from 10V to 650V, sales of the 80V and 120V output ZUP models have fallen significantly.

We are therefore offering a last time buy for those models. This applies to the following part numbers:

Model	Replacement
ZUP802.5	Z100-4
ZUP802.5/U	Z100-4-U
ZUP805	Z100-6
ZUP805/U	Z100-6-U
ZUP1201.8	Z160-2.6
ZUP1201.8/U	Z160-2.6-U
ZUP1203.6	Z160-4
ZUP1203.6/U	Z160-4-U

TDK-Lambda recognizes that as a past or current customer of these products, you may require additional units until substitution testing is complete or for service spares. We are offering a last time buy opportunity until May 24th, 2021, with a last time ship date of November 30th 2021. Please understand that these orders would be non-cancelable and non-returnable and cannot be counted towards future stock rotations.

Please contact our technical support for additional information at 1-800-526-2324 or email powersolutions@us.tdk-lambda.com.
