

To: Rubycon Customers

Notice of Production Discontinuance of ST series (PMLCAP)

We would like to announce the discontinuation of our ST series which is one of the PMLCAP® (Polymer Multilayer Capacitors) lineup.

The ST series will be integrated into MU series which is fully compatible for form, fit and function and an upgrade of our ST series. The primary difference in the MU series is the elimination of nickel. This may be a benefit for high end audio applications.

The discontinuation details and schedule are as below.

1. Items to be discontinued

ST series

RatdeVoltage	Capacitance Range
16Vdc	154~226 (0.15μF ~ 22μF)
25Vdc	104~156 (0.10μF ~ 15μF)
35Vdc	473~106 (0.047μF ~ 22μF)
50Vdc	333~475 (0.033μF ~ 4.7μF)
63Vdc	102~335 (0.001μF ~ 3.3μF)
100Vdc	102~104 (0.001μF ~ 0.1μF)

2. Substitution series

MU series

It can be substituted with products of the same Rated and Voltage, Capacitance and Size.

3. Discontinuation schedule

By September 30, 2018.

For further details, please kindly inquire with our local sales office.

Thank you very much in advance for your understanding and cooperation.

Sincerely yours,

Rubycon Corporation Sales Headquarters
