DESCRIPTION AND PURPOSE OF CHANGE:

Because of a database mismatch, Würth Elektronik update the schematic.

This is a datasheet correction only. There will be no change in form, fit, function, quality or reliability of the product.

DETAIL OF CHANGE:

The schematic shows wrongly that the GND Pin is connected on cathode side of the internal Z-Diode. But the real connection of GND Pin is on anode side.

RELIABILITY / QUALIFICATION SUMMARY:

There will be no change of the product, therefore no additional reliability or qualification testing will be performed.
